EXPERIMENT-17

AIM:

Activity diagram for Online shopping system using CASE tools.

OBJECTIVE:

Now a days the life style of the people is different. People feel uncomfortable and time consuming for going crowded markets. So, E-Shopping is a boon as it saves lot of time. Online shopping is a process whereby consumers directly buy goods, services etc. from a seller without an intermediary service over the Internet. Shoppers can visit web stores from the comfort of their house and shop as by sitting in front of the computer. Online stores are usually available 24 hours a day and many consumers have internet access both at work and at home. So, it is very convenient for them to shop Online. One of the most enticing factors about online shopping, particularly during holiday season is, it alleviates the need to wait in long lines or search from a store for a particular item. Variety of goods are available in online. So, the researcher wants to know the preference of the consumers.
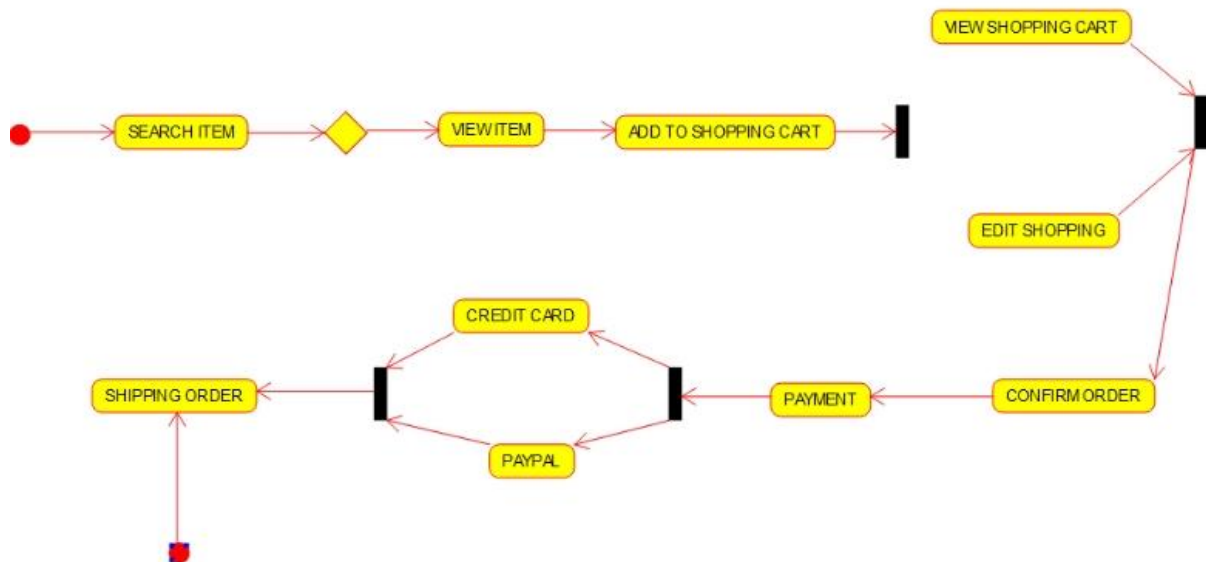

PROCEDURE:

➢ For drawing an activity diagram for online shopping system, we have to download umbrella software for PC.

➢ After downloading the software install it in your PC and open it.

➢ Now just above the top of the work space an icon is there which contains several types of diagrams from that class.

➢ Your required tools displayed on top left of the screen (select, note, anchor, label, box, initial activity, activity, end activity, final activity, branch/merge, fork/join, activity transition, exception, pre/post condition, send signal, accept signal, accept time event, region, pin and object node).

➢ For drawing activity diagram for online shopping system search a suitable diagram from google for reference and draw the diagram in the work space as shown in google with the help of tools.

- ➢ After drawing the activity diagram save it and take a screen shot of the diagram.
- ➢ Go to paint app in your PC and paste the image you captured and select only the image, copy it.
- ➢ Now open word document and paste it under related experiment.

OUTPUT:

ACTIVITY DIAGRAM FOR ONLINE SHOPPING SYSTEM.

RESULT:

Thus, Activity diagram for Online shopping system is implemented successfully.
